

Trade Data Visualisation Beta Testing Checklist

Louis Tsiattalou

19th December 2017

This document is intended to be a checklist for the purposes of quality assuring the Trade Data Visualisation web application. If you have a copy of this sheet, it means that you have been asked to help identify bugs and errors in the application during the beta testing phase of the project.

1 Technical

- ☐ Does the app crash when no data is returned from a query?
- ☐ Do the Visualisations render correctly?
 - ☐ Sankey Diagrams
 - ☐ World Map Visualisation
 - ☐ Time Series Plots
 - * ☐ Comcode
 - * ☐ Country
 - * ☐ Port
- ☐ Do the Visualisations make intuitive sense?
- ☐ Is there anything missing from the application that you'd like to see?

2 UI

- ☐ Is the performance of the app acceptable?
- ☐ Do the Commodity Code Selectors cascade correctly?

This means, are all the commodity codes displayed in the selectors descendants of those selected in lower-digit fields?
- ☐ Is the Date Range displaying all valid values?

- ☐ Is everything reasonably sized on the page?
- ☐ When running new queries, is it clear that the app is working, or does it just look frozen?
- ☐ Do the search functions on the Comcode Lookup tab work correctly?
 - ☐ Fuzzy Search bar at top
 - ☐ Comcode Search
 - ☐ Description Search
- ☐ Are the Comcode Legend entries (above the visualisations) showing *only* the comcodes in play?
- ☐ Is the interface of the app intuitive?
 - Please enter any comments on how to improve the interface of the app:
